To Whom It May Concern:

Master Naturalist Certification - All Skill Levels Welcome
Build Awareness of Climate Change, Land & Marine Conservation,
Water Quality, Wildlife, Mindfulness & Advocacy

The Master Naturalist Certification program is a well-rounded introduction to the Long Island natural environment, connecting learners with local experts in this train-the-trainer program. We encourage Master Naturalists in training to expand their knowledge by becoming familiar with a broad range of topics, and at the same time encourage refinement of interests. All skill levels are welcome.

Certification Benefits

- Discovery of self and the real Long Island by becoming a keen observer, inspired by the natural world that surrounds us
- Gain hands on experience in public lands conservation and management for recreational, aesthetic and preservation purposes
- Practice leadership skills. School teachers can receive 32 CTLE credits, as Quality Parks is a certified provider.

About Us

Quality Parks is a professional organization sponsoring projects to improve both business and environmental conditions by balancing social, economic and environmental concerns. We are a federally registered 501(c)(3) nonprofit, on Long Island, since 2000. Our Master Naturalist Certification Program was designed to encourage critical thinking. It builds upon formal instruction, and is fun, relaxing, and rewarding. To learn more about the program visit: <https://www.qualityparks.org/master-naturalists.html>

I have attached a brochure and a flyer for posting/distribution to interested professors, teachers, instructors, staff, clubs, students, parents and/or community leaders. Please don't hesitate to contact me with any questions.

Sincerely,

Mindy Block, Quality Parks President
